Recent Projects

WriteFree
jessereitz.github.io/WriteFree

Designed and built an easily-embeddable "what you see is what you get" (WYSIWYG) rich text editor similar to the Medium.com editor. Written in ES6 JavaScript utilizing content-editable HTML Elements. Transpiled using Rollup.js and Babel.

ISA Easy Email
jessereitz.github.io/ISAEasyEmail

Utilizing the WriteFree editor (above), implemented a WYSIWYG HTML email editor as an alternative to an in-house HTML email tool at my previous company. Made use of the HTML5 File API to provide save/load functionality and the Selection API for automatic copying of the email. Created an interactive in-depth walk through tutorial. Written in ES6 JavaScript using Rollup.js and Babel.

Safety Penguin

Created a personal safety web app built using the Django Python framework. Built to keep myself safe on solo motorcycle rides and hikes. Allows users to create check-ins via web or SMS text message. If they don't check in by their specified time, an alert is sent to their chosen emergency contact via email and SMS text message. Experience in administering PostgreSQL database in a Linux environment.
